Once I installed the app on my phone I was able to print out any pictures on my phone, I wanted to. I also found where the settings are and adjusted the brightness and you can crop as well. We have been having fun printing out pictures in different ways to see what all it will do. It is limited on settings, but it makes the cutest little pics. After all, it is a very small printer and it is limited, as should be expected.

photo printing is not bad, but it is impossible to print documents...It is not possible to send the document from the share button within other apps and the app itself does not upload document files. It needs to improve a lot. I bought a printer that, unfortunately, only works with this app. Other apps are better, but they don't connect to the printer.
